PROFILE

I'm a detailed-oriented Software developer with over five years of experience developing and deploying scalable applications. I prioritizes application security, optimization, user experience along with a firm understanding of backend architecture. My proficiency spans across the following stacks; **React**, **React Native**, **NextJS**, **JavaScript**, **TypeScript**, and more. I'm passionate about building clean, efficient and user-focused software solutions. I've been able to build several applications with these technologies and I will contribute immensely through collaborative effort and hard work, and also by doing everything necessary to assist the team in order to get the job done.

EXPERIENCE

Emerald Energy Resources Limited— *Software* Developer

Aug 2021 - Present

Project Name: EERL INTERACT

Description:
Emerald Interact (EERL INTERACT) is an in-house Human Resources Management System designed to handle a wide range of HR functions, including leave applications, loan requests, requisitions, approvals, time and attendance tracking, payroll, and other key workforce functions.

Role:
I was responsible for building the UI for EERL INTERACT. My responsibilities also include delivering end-to-end solutions, making key design and implementation decisions, translating business needs into software solutions that drive profitability and growth, defining and maintaining the overall development architecture, performing UI slicing, delegating tasks, fostering collaboration, and ensuring the adoption of best practices in software development. I likewise handle API integration, application security, and ongoing software maintenance.

Technology Stack:
React Native, React, Redux-ToolKit, Tanstack Query, Travis CI, Material-UI, MongoDB, NodeJS, GitHub, React testing Library

The GIG Group — *Frontend Developer*

SKILLS

- Javascript
- Typescript
- React
