PROFILE

I'm a Software Engineer developer who prioritizes application security, optimization, and user experience along with a basic understanding of backend architecture. My proficiency spans across the following stacks: **React, React Native, NextJs, JavaScript, TypeScript,** and many more. I am also constantly learning various other technologies that are useful in the industry. With the experience gathered using these technologies, I've been able to build several applications with them. I am a quick learner and work well in a team, and I am confident that my unique blend of skills and experience will make me an asset to any team. I am especially keen to take on new challenges and contribute to projects that would simplify the way we live and do things and ultimately make a meaningful impact on people's lives. I will contribute immensely through collaborative effort and hard work, and by doing everything necessary to assist the team to get the job done.

SKILLS

- Javascript
- Typescript
- React
- React Native
- NextJs
- CSS3
- Redux
- Redux-toolkit

EXPERIENCE

Emerald Energy Resources Limited— Software Engineer

August 2021 - Present

Project Name: RS INTERACT

Description:
Emerald Interact (RS INTERACT) is an in-house Enterprise Resource Planning application built with systems such as SAP and Odoo to handle applications like Vendor management, Inventory requisition, Leave requisition, Budgets, CRM, Service acquisition, User management, Roles etc. I was also the team lead on the project, we used Travis CI to handle continuous integration and deployment on the project and Trello as our project management tool. The technology stack used for the project included ReactJS, React Native, Redux, AWS, Material-UI, MongoDB, NodeJS, ExpressJS, GitHub, CI/CD. I am also involved in the maintenance of the application.

Role:
I was responsible for building the UI for RS INTERACT, and was also the team lead on the project, we used Travis CI to handle continuous integration and deployment on the project and Trello as our project management tool.

Technology Stack: ReactJS, Redux, AWS, Material-UI, MongoDB, NodeJS, Styled-components, ExpressJs, GitHub, CI/CD

TOOLS

- Styled-components
- SASS
- Material-UI
- TailwindCSS
- React-Boostrap
- MongoDB
- AWS
- GitHub

The Code Center — Fullstack Developer / Instructor

DEC 2020 - MAR 2021

Project Name: [The Code Center](#)

Description:

The code center is a coding bootcamp for young aspiring developers, by providing an enabling environment for collaboration and growth.

Role:

I worked alongside several brilliant engineers as an instructor, helped boot campers learn the basics of CSS, HTML and Javascript, and on projects I collaborated as a Frontend Developer

Technology Stack: Javascript, React, NodeJS, SASS, MongoDB, Bootstrap

Swapspace — Frontend Developer

MAR 2020 - DEC 2020

Description

Swapspace is a coding bootcamp, but also a tech hub where many developers could converge, collaborate, learn, and exchange ideas, or on occasion, contribute to projects.

Role: Frontend developer

Technology Stack: Javascript, React, GraphQL, Redux, PHP, Laravel, MySQL, Bootstrap, MongoDB
