SKILLS

FRONTEND

React JavaScript ES6+ TypeScript
Next.js Redux Toolkit React Native
TailwindCSS Material-UI
Styled Components

BACKEND & DB

Node.js Express.js MongoDB
GraphQL REST APIs

TESTING & CI/CD

Jest Cypress RTL Travis CI
GitHub Actions

DEVOPS & CLOUD

AWS EC2/S3 Lambda Docker

TOOLS

Figma Jira Postman Git/GitHub
SASS

EDUCATION

B.Sc. Applied Physics

University of Lagos, Nigeria

PROFILE

Software Engineer with over 5 years of experience building and maintaining frontend and fullstack applications using React, JavaScript, TypeScript, Node.js, and modern software technologies. Experienced in designing enterprise business applications, integrating APIs, optimizing performance, and delivering maintainable software solutions. Skilled at collaborating with cross-functional teams to translate business requirements into intuitive digital products.

EXPERIENCE

Emerald Energy Resources Ltd

Aug 2021 – Present

SOFTWARE ENGINEER

EERL Interact — Enterprise Resource Planning Application

- Led frontend development of an ERP supporting HR, payroll, leave management and requisition workflows across multiple departments, improving UI performance through reusable React architecture and optimized state management.
- Integrated backend APIs and automated key business workflows, contributing to a 40% reduction in administrative workload.
- Implemented role-based access control, secure authentication, and audit logging to strengthen security and visibility across the application.
- Oversaw CI/CD pipelines using Travis CI and GitHub Actions.

React Redux Toolkit Node.js MongoDB Travis CI Material-UI

The GIG Group

Dec 2020 – Aug 2021

SOFTWARE DEVELOPER

GIGM Web App — Online Transportation Ticket Booking Platform

- Designed and implemented key user-facing components using React, Bootstrap, and jQuery.
- Served as team lead, coordinating sprints and resolving front-end bottlenecks.
- Improved overall page responsiveness and accessibility for desktop and mobile platforms.

React jQuery Bootstrap Animate.css Jira

Swapspace

Mar 2020 – Dec 2020

FRONTEND DEVELOPER

- Built and maintained front-end modules for a developer learning and collaboration platform.
- Contributed using React, Vue.js, and GraphQL, integrating APIs built with Laravel and MongoDB.
- Worked in a collaborative environment focused on mentoring, peer review, and agile workflow.

React Vue.js GraphQL Redux MongoDB MySQL

PROJECTS

Enterprise Resource Planning Application

jlb-rbac-erp.netlify.app

A full-featured ERP application with a metrics dashboard, payroll management, leave and loan request workflows, audit logs, and role-based access control that dynamically adjusts the UI per user role. This portfolio version showcases key workflows and features adapted from an internal ERP platform I developed professionally, while excluding proprietary company data and functionality.

RSS Feed Aggregator

jlb-rssfeed.netlify.app

A full-stack customizable content aggregator pulling RSS and Atom feeds into one reading dashboard, with user authentication and intelligent feed caching.

E-commerce Platform

dessert-shop.onrender.com

A production-grade dessert shopping web app with full cart functionalities, PayPal integration, secure authentication, and an admin CMS dashboard for managing products.
