Profile

Software Engineer with over 5 years of experience building and maintaining frontend and full-stack applications using React, JavaScript, TypeScript, Node.js, and modern software technologies. Experienced in designing and implementing enterprise business applications, integrating APIs, optimizing application performance and delivering maintainable software solutions. Skilled at collaborating with cross functional teams to translate business requirements into intuitive digital products that provide meaningful value to users and organizations.

Technical Skills

Frontend: React, JavaScript (ES6+), TypeScript, React Native, Next.js, Redux Toolkit, TailwindCSS, Material-UI, Styled Components

Backend & Databases: Node.js, Express.js, MongoDB, GraphQL, REST APIs

Testing & CI/CD: Jest, Cypress, React Testing Library, Travis CI, GitHub Actions

DevOps & Cloud: AWS (EC2, S3, Lambda), Docker (basic)

Tools & Design: Figma, Jira, SASS, Postman, Git/GitHub

Professional Experience

[Emerald Energy Resources Limited](#) — Software Engineer

Aug 2021 – Present | Lagos, Nigeria

Project: EERL Interact — Enterprise Resource Planning Application.

- Led frontend development of an ERP application supporting HR, payroll, leave management, requisition workflow and other core business modules used across multiple departments, improving UI performance, maintainability and operational efficiency through reusable React architecture and optimized state management.
- Integrated backend APIs and automated key business workflows, contributing to a 40% reduction in administrative workload.
- Implemented role-based access control, secure authentication and audit logging feature to strengthen security and improve visibility across the application.
- Oversaw CI/CD pipelines using Travis CI and GitHub Actions.

Tech Stack: React, Redux Toolkit, Node.js, MongoDB, Travis CI, Material-UI, GitHub

The GIG Group — Software Developer

Dec 2020 – Aug 2021 | Lagos, Nigeria

Project: GIGM Web Application — an online transportation ticket booking platform.

- Designed and implemented key user-facing components using React, Bootstrap, and jQuery.
- Worked closely with backend teams to ensure responsive UI and smooth API integration.
- Served as team lead, coordinating sprints and resolving front-end bottlenecks.
- Improved overall page responsiveness and accessibility for desktop and mobile platforms.

Tech Stack: React, jQuery, Bootstrap, Animate.css, Bitbucket, Jira

Swapspace — Frontend Developer

Mar 2020 – Dec 2020 | Lagos, Nigeria

- Built and maintained front-end modules for a developer learning and collaboration platform.
- Contributed to projects using React, Vue.js, and GraphQL, integrating backend APIs built with Laravel and MongoDB.
- Worked in a collaborative dev environment focused on mentoring, peer review, and agile workflow.

Tech Stack: React, Vue.js, GraphQL, Redux, Laravel, PHP, MySQL, MongoDB

Education

Bachelor of Science (B.Sc.) in Applied Physics

University of Lagos, Nigeria

Projects

Enterprise Resource Planning Application (Demo) — <https://jlb-rbac-erp.netlify.app>

Public demonstration of enterprise workflows including role-based access control, employee management, leave approvals, permissions management, audit tracking, and dashboard analytics inspired by real-world business applications.

RSS Feed Aggregator — <https://jlb-rssfeed.netlify.app>

A full-stack customizable content aggregator that pulls RSS and Atom feeds into one well designed reading dashboard. It features user authentication and caching of feed data.

E-commerce Platform — <https://dessert-shop.onrender.com>

A production grade dessert shopping web app with full cart functionalities, PayPal integration, secure authentication, and an admin CMS dashboard for managing desserts.
